Professional Summary

Frontend Developer with 3+ years of experience in building responsive, scalable, and user-focused web applications. Skilled in developing modern SPAs using **HTML, CSS, JavaScript, TypeScript, Angular, and React.js**, with additional hands-on experience in **Redux for state management** and Webpack for efficient bundling. Experienced in backend integration using **Node.js (Express.js)** and implementing RESTful architecture for smooth API communication. Strong in UI/UX optimization, crafting modern interfaces with **Material UI, Bootstrap, and ng-Bootstrap**, and integrating REST APIs into production environments. Proficient in **version control (Git/GitHub), cloud & tooling (Firebase, Azure DevOps, Postman)**, and agile workflows. Focused on delivering clean code, high performance, and seamless user experiences.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, TypeScript, Angular, React.js
- **Backend:** Node.js, Express.js
- **UI Libraries:** Material UI, Bootstrap, ng-Bootstrap, RxJS, NgRX
- **Tools & DevOps:** Git, GitHub, Azure DevOps (ADO), Firebase, Postman, VS Code, Visual Studio
- **APIs & Patterns:** REST API, JSON, JWT

Professional Experience

Unimrkt Response LLP — Frontend Developer

Gurugram, India | Nov 2022 – Present

Working on **Opinion-Edge**, a multilingual market-research and reward platform. Built high-performance UI features, enhanced site speed, and collaborated with cross-functional teams to deliver scalable and user-centric solutions.

Key Contributions:

- Enhanced platform performance by **30%** through code-splitting, lazy loading, and UI optimizations; implemented secure authentication with refresh tokens and auto-login, reducing drop-offs by **25%**.
- Built responsive, reusable UI components using **Angular, TypeScript, HTML/CSS, ng-Bootstrap**, improving development speed by **20%**.
- Integrated Angular i18n supporting **22 languages across 34 countries**; optimized the reward points/redemption system to boost engagement by **15%**.
- Built **AG Grid**-based interactive dashboards improving visibility by **40%**; contributed to Agile sprints and managed CI/CD pipelines using **Azure DevOps**.

AI & Automation Enhancements:

- Added AI-based text recommendations, automated translation workflows (**35%** faster content creation), and supported AI-driven fraud detection for more accurate survey quality checks.
- Leveraged AI coding tools to cut bugs and speed development by **20%**, and automated DevOps workflows to reduce manual deployment steps by **50%**.

Tech Stack: Angular, TypeScript, JavaScript, HTML5, CSS3, ng-Bootstrap, AG Grid, REST API, Node.js (basic), Azure DevOps (ADO), Git/GitHub, Firebase, Postman, VS Code

Selected Projects

Opinion-Edge

Frontend Angular Developer | Mar 2023 – Present

[Project Link: https://panel.opinion-edge.com/](https://panel.opinion-edge.com/)

A multilingual market research platform with a reward system for survey participation, supporting users across 32 countries.

- Built and enhanced the point-based reward system for survey completions and redemptions.
- Integrated **Angular i18n** to support **22 languages**, significantly expanding global accessibility.
- Utilized **Angular, TypeScript, ng-Bootstrap**, and Azure DevOps for CI/CD and agile delivery.
- Developed core frontend features including secure authentication with refresh tokens and auto-login for seamless user experience.

Cows and Bulls Game

Full Stack Developer | Jul 2024 – Sep 2024

[Project Link: https://cows-bulls-e9faf.web.app/](https://cows-bulls-e9faf.web.app/)

An interactive multiplayer word-guessing game inspired by the classic “**Cows and Bulls**” concept, designed to enhance engagement and real-time competition.

- Created a real-time **multiplayer word-guessing game** based on “Cows and Bulls” to enhance engagement and competition.
- Developed frontend with **Angular** and backend with **Node.js/Express**, using **Socket.IO**, **WebSocket's**, and **MongoDB** for seamless gameplay and state management.
- Applied game logic and focused on scalable full-stack, real-time application development.

E-Commerce Platform

Full Stack Developer | Self-initiated Project

A full-stack e-commerce Platform featuring a responsive UI, secure APIs, and robust backend services with **Payment** and **Authentication** integration.

- Designed responsive frontend with Angular, SCSS, and Material UI for a seamless cross-device user experience.
- Built secure RESTful APIs using Node.js/Express.js and integrated **Razorpay payment gateway** for secure online transactions and **Google Login/Signup** for easy user authentication.
- Implemented **PostgreSQL** for reliable data management, demonstrating full-stack expertise in modern web technologies.

Education

- Mahatma Gandhi Chitrakoot Gramodaya Vishwavidyalaya Chitrakoot MP Bachelor of Science, Computer Science | Oct 2022 | 72%

Certifications

- Web Development Bootcamp 2022 (Udemy, 2022)
- Angular Certificate (TestDome, 2024)
- The Complete Node.js Developer Course (Udemy, 2024)
